¹⁾ pumps with sequencer

Peristaltic Pumps Overview

ETL 200

Features

- Dual spring-loaded occlusion for maximum tube lifetime and accuracy
- Easy tube loading with one movement
- Usage of bridged tubing
- Stepper motor
- Controller board available

Applications

- Transfer of fluids in analytical and biopharma processes
- Dispensing of reagents in in-vitro diagnostics (IVD)

SERIES SR10

Features

- Speed reduction through frictional connection from the motor shaft to the rollers.
- Very simple construction with the use of few parts only.
- Easy change of the cassette.
- Generally 3 rollers.
- For short time operation only.
- If the pump is stored longer than three months, we recommend to take the cassette off the motor shaft and store it separately.
- Different motors available (DC, low cost DC, AC and stepper motor).

Applications

- Transfer of fluids in bioprocessing
- Dispensing of reagents in in-vitro diagnostics (IVD)
- Dispensing of detergent in washers / disinfectors
- Dispensing of foods and beverages

SERIES SR18

Features

- Peristaltic pump with QuiXchange system
- Tube exchange without tooling within seconds
- Spring loaded roller carrier with two rollers for extremely long durability
- Optional „sequencer“ for flow adjustment
- AC-motor

Applications

- Dispensing of detergent in industrial dishwashers

SERIES SR25

Features

- Protection of the tubing due to spring loaded rollers and guiding side rollers.
- Quick and easy change of the tubing.
- Roller carrier with two rollers.
- Also suitable for continuous operation, depending on the drive.
- If stored longer than three months, we recommend to remove the tubing.
- Different gear motors available (DC, AC and stepper motor).

Applications

- Deaeration of dialysate in dialysis devices
- Condensate removal in environmental emissions monitoring

Peristaltic Pumps Overview

Pumps Tubing

Tubing Properties		
Tube	Characteristics	Limitations
Novoprene	Standard tubing for the SR10/30, SR10/50 and SR25 Long lifetime Wide range of applications	May swell up with oil or oily liquids
Norprene®	Standard tubing for the SR10/100 Long lifetime Suitable especially for alkaline solutions	
PharMed BPT / Pharm-A-Line™	High quality for medical, laboratory and research use Homogeneous structure and therefore comparatively better chem. resistance Autoclavable Biocompatible Long lifetime	
Silicone	Suitable for polar solvents (with the exception of chlorinated aliphatic and aromatized hydrocarbon) No detachment of softening agents Very stable elasticity over a wide temperature range (-30 bis 180 °C)	Not recommended with strong acids or alkaline solutions Swells up in many organic solutions

Choice of tubing depending on flow medium						
		Novoprene	Norprene®	PharMed BPT	Pharm-A-Line™	Silicone
Acids	weak medium strong	very good good not recommended				good unsatisfactory not recommended
Alkaline solution	weak medium strong	very good good not recommended		very good very good good		good unsatisfactory not recommended
Hydro-carbons	aliphatic aromatized halogenated	not recommended				
Standards/ physiological behaviour		basis material meets FDA (21 CFR 177.2600) doesn't fulfill the EU food requirement 2002/72/EC	not recommended for food, drinks or medicine	USP, class VI ISO 10993 Parts 4,5 and 11	USP, class VI ISO 10993 Parts 4, 5 FDA (21 CFR 177.2600)	physiologically inert
Chemical structure		thermoplastic elastomer on PP-Basis with cross linked EPDM parts	thermoplastic elastomer on PP-Basis	thermoplastic elastomer on PP-Basis	thermoplastic elastomer on PP-Basis	high cross linked Polysiloxane with anorganic fillers
