## 3. Composition/information on ingredients

**General information:** The components are not hazardous or are below required disclosure limits.

# 4. First-aid measures

**Ingestion:** Do NOT induce vomiting. Aspiration of material due to vomiting can cause

chemical pneumonitis which can be fatal. If vomiting occurs naturally, the

casualty should lean forward to reduce the risk of aspiration.

**Inhalation:** Remove exposed person to fresh air if adverse effects are observed.

**Skin Contact:** Wash with soap and water. If skin irritation occurs, get medical attention.

**Eye contact:** Any material that contacts the eye should be washed out immediately with

water. If easy to do, remove contact lenses.

Most important symptoms/effects, acute and delayed

**Symptoms:** See section 11.

Indication of immediate medical attention and special treatment needed

**Treatment:** Treat symptomatically.

5. Fire-fighting measures

**General Fire Hazards:** No unusual fire or explosion hazards noted.

Suitable (and unsuitable) extinguishing media

Suitable extinguishing

media:

CO2, dry chemical, foam, water spray, water fog.

Unsuitable extinguishing

media:

Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from

the chemical:

A solid stream of water will spread the burning material. Material creates a special hazard because it floats on water. See section 10 for additional

information.

Special protective equipment and precautions for firefighters

Special fire fighting

procedures:

No data available.

Special protective

equipment for fire-fighters:

Recommend wearing self-contained breathing apparatus.

# 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:

Personal Protective Equipment must be worn, see Personal Protection

Section for PPE recommendations.

Methods and material for containment and cleaning up:

Dike far ahead of larger spill for later recovery and disposal. Pick up free liquid for recycle and/or disposal. Residual liquid can be absorbed on inert

material.

**Environmental Precautions:** Avoid release to the environment. Do not contaminate water sources or

sewer. Environmental manager must be informed of all major spillages.

Prevent further leakage or spillage if safe to do so.

7. Handling and storage

**Precautions for safe handling:** Do not breathe thermal decomposition products.

Observe good industrial hygiene practices. Provide adequate ventilation.

Wear appropriate personal protective equipment.

# 8. Exposure controls/personal protection

#### **Control Parameters:**

### **Occupational Exposure Limits**

None of the components have assigned exposure limits.

Appropriate engineering

controls:

Mechanical ventilation or local exhaust ventilation may be required. No

special requirements under ordinary conditions of use and with adequate

ventilation.

### Individual protection measures, such as personal protective equipment

**General information:** Use personal protective equipment as required.

Eye/face protection: If contact is likely, safety glasses with side shields are recommended.

**Skin Protection** 

**Hand Protection:** Suitable gloves can be recommended by the glove supplier. Consult

clothing/glove manufacturer to determine appropriate type of glove for given situation. Gloves should always be inspected before each use and discarded

if they show tears, pinholes, or signs of wear.

Other: No data available.

**Respiratory Protection:** Consult with an industrial hygienist to determine the appropriate respiratory

protection for your specific use of this material. A respiratory protection program compliant with all applicable regulations must be followed whenever workplace conditions require the use of a respirator.

**Hygiene measures:** Always observe good personal hygiene measures, such as washing after

handling the material and before eating, drinking, and/or smoking. Routinely

wash work clothing to remove contaminants. Discard contaminated

footwear that cannot be cleaned.
