

1-1/2" x 1" End Suction Centrifugal Pump

Made with high quality investment cast 316 stainless steel components, the ChemFlo® series of pumps are designed to be applied in a wide range of pumping applications where stainless steel is required.

The ChemFlo® 2 hydraulic pumps utilize a semi-open impeller design to allow for passage of larger solid sizes than similar sized enclosed impellers. Several mechanical seal options are available in addition to the standard type 2100 carbon / ceramic / Viton mechanical seal.

ChemFlo® 2 hydraulic pumps are offered with .22 or .37 cubic inch displacement SAE port fitting gerotor type motors for hydraulic flows up to 10 GPM and a maximum pressure of 2600 PSI. An optional case drain allows the motor to be used in series with other hydraulic devises. Some hydraulic motors are bi-rotational.

ChemFlo® 2 hydraulic pumps are offered with .22 or .37 cubic inch displacement gerotor motors for hydraulic flows up to 10 GPM and a maximum pressure of 2600 PSI.

Further expanding the versatility of the ChemFlo® series is the CFB 2 pump, a ChemFlo® 2 in NiBrAl material. All wetted parts are produced in CA 958 nickel aluminum bronze including the drive sleeve to maximize corrosion protection in seawater applications.

#### **Application**

- Agricultural
- Commercial
- Industrial
- Marine
- OEM

### SPECIFICATIONS:

Suction And Discharge 1-1/2" x 1" NPT

Materials Of Construction 316 stainless steel, CFB (nickel aluminum

bronze)

Flow Up to 150 GPM

Head Feet Up to 300'

Impeller 5.25" semi-open, cast 316 stainless steel

Drive Options Hydraulic motor .22 cu. in, Hydraulic motor

.37 cu. in.

Seal Special seal material combinations

available (consult factory), Standard

carbon / ceramic / Viton

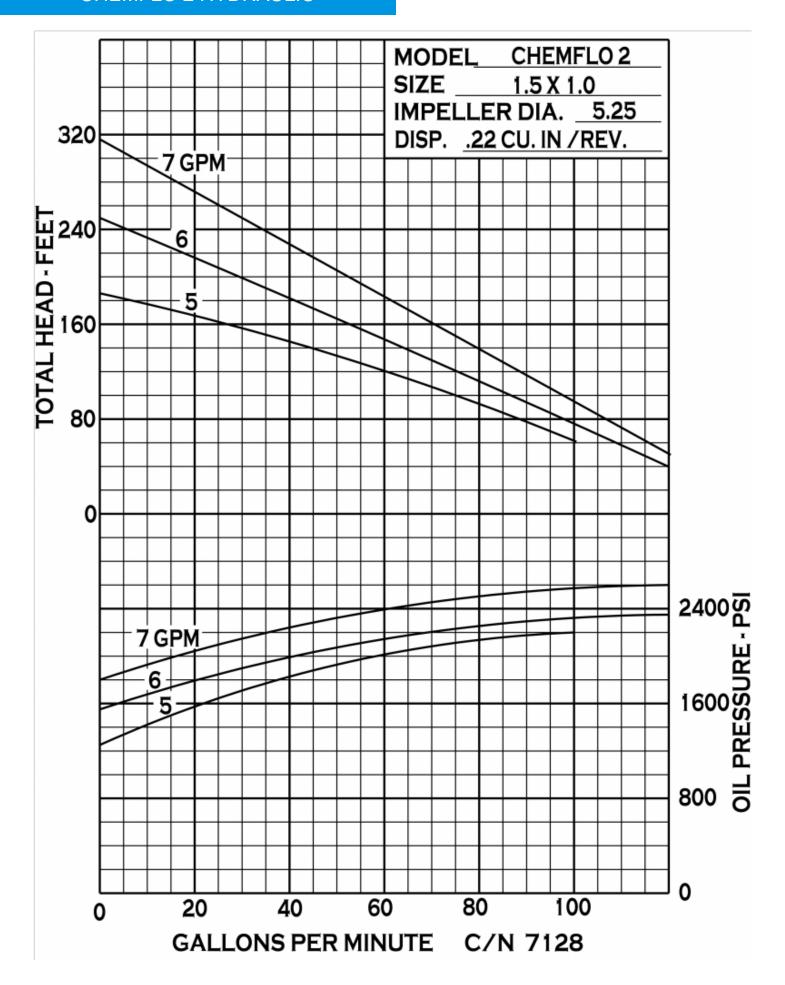

Hydraulic System Pressure Up to 2600 PSI

Options Hydraulic motors with flow control

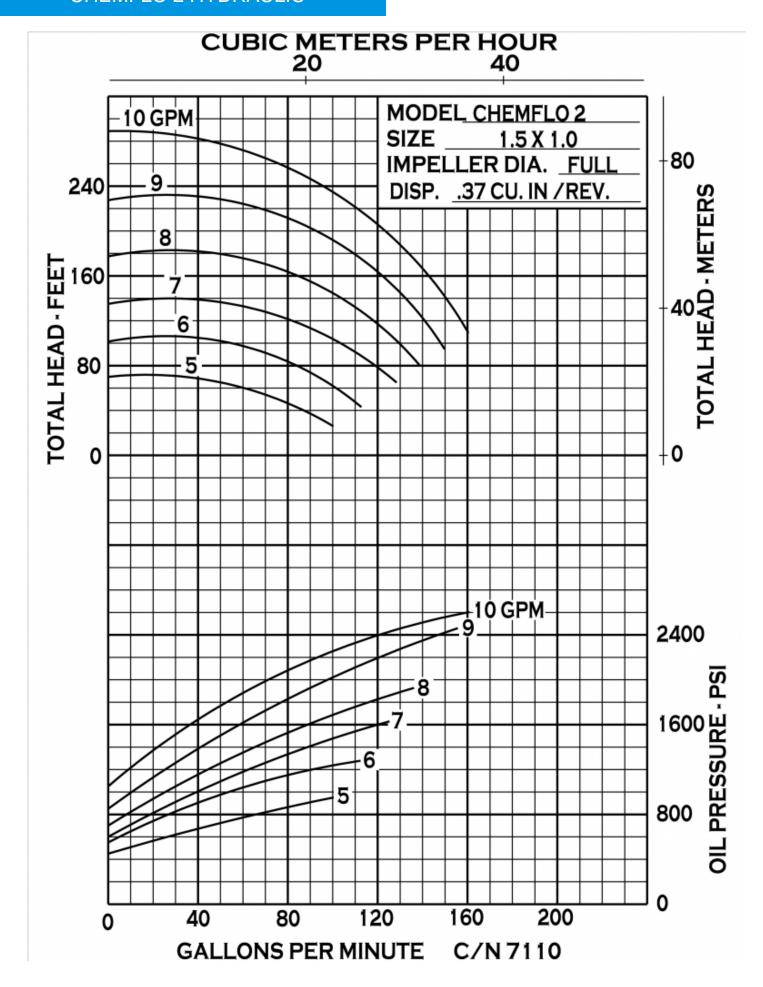

Psi Up to 130

Hydraulic Fluid Flow Up to 10 GPM

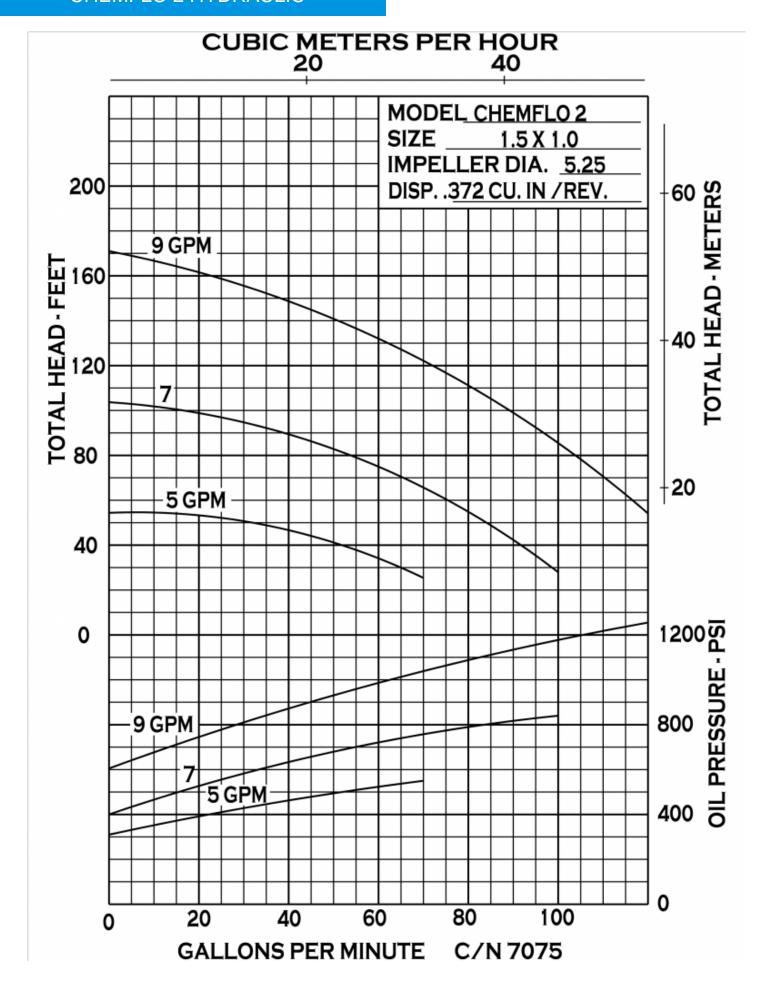

Hydraulic Motor Gerotor, Bi-Rotational, Optional case drain

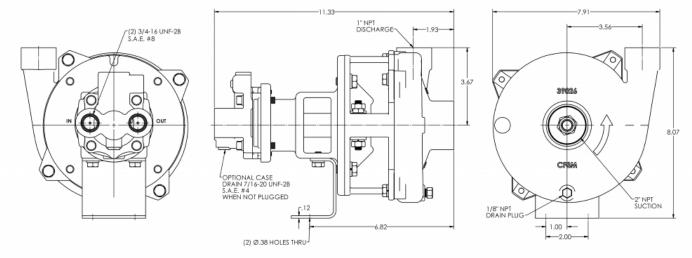

CF2 .37 DISP MOTOR
